Reliable Riding Experience

Trusted Elevator Solution

“A flexible solution that unifies form and function. An all-round elevator applicable to multiple building types, with outstanding architectural flexibility for car, door and shaft dimensions. Precision assure a smooth and safe user experience.”

Modern Elevator for Residential & Commercial Buildings

Created to enhance the modern and contemporary look of low, mid & high-rise residential buildings and low & mid-rise commercial buildings.

The design-rich KRUPA ELEVATORS now offer more flexibility to choose the ideal elevators that add to the look, feel, style and class of both your building's interiors and exteriors.

Excellent ride comfort, energy savings, product design with futuristic technology & impressive aesthetics all come together in perfect combination from KRUPA ELEVATORS, to take the quality of elevator experiences several notches higher for the builder, developer, architect, facility manager and the end user.

IDEAL
PARTNER

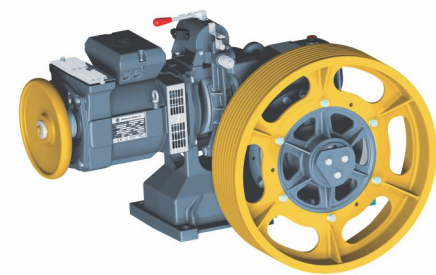

High Energy Efficiency

Best in class energy saving technology that cuts the carbon footprint and provides green environment to the customer.

Energy efficient PMS traction machine

Our green, environment friendly PMS traction machine is a compact, reliable, gear less machine with greater energy efficiency. It consumes upto 30% less energy than conventional geared machine.

Geared Machine

Gearless Machine

Energy efficient inverter

The high performance inverter increases energy efficiency and make it an eco-friendly product.

Specially engineered for elevators with German Know-how.

Long lasting energy efficient LED lights

LED lights consume up to 50% less energy as compared to fluorescent lighting.

These lights have six times longer life than conventional fluorescent lighting.

Car lights switch off automatically when elevator is not in use thus further saving energy.

Inbuilt CDL (Car Door Lock)
Automatically locks the car doors when stuck between floors.

Full Height Door Sensors
A curtain of light ensures safe entry and exit.

Emergency Rescue Device (Optional)
Automatically takes elevators to the nearest floor during power failures.

Smart User Interfaces
Easy accessibility for every user including the visually challenged. Elevators call using touchless buttons for safe and healthy ride.

Automatic Brake Inspection
Every day automatic brake testing to ensure safe & smooth travel.

Reliable & Safe Hoisting System
Proven rope technology that is reliable & easy to inspect.

Accurate levelling
Closed loop drive ensures levelling accuracy eliminating risk of tripping.

Freedom of design

Create the look and feel you like. Combine colors, materials, lighting, mirrors, handrails and fixtures to achieve the ambiance that fits both your ideas and your building. Choose from one of our four interior design lines or design the whole car to your own taste.

Basic

KEC-01

Ceiling	S.S. Ceiling with LED Light
Car Operating Panel	S.S. wall mounted panel with Luminous Button (Square) with Digital floor Positioning Indicator
Car Wall	S.S. Hairline Finish with Back side full mirror
Flooring	PVC Flooring

(Four Panel)

Automatic Doors Elevator

Total elevators door systems focus on three main areas, safety, reliability and speed.

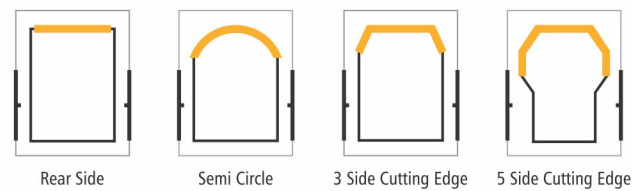

Krupa Capsule Elevator

Smooth operation
comfortable travel

Available Rated Speed	1.0, / 1.5 / 2 MPS
Max Travel Height	66 M
Available Rated Capacity	408 to 1088 Kgs
Max Passengers	06 to 16 Passengers

There is a variety of forms to meet different needs.

There is a variety of forms to meet different needs.

Full Glass Capsule

Three Side Glass With
MS Powder Coated Car

Three Side Square
Glass Capsule

Round Glass Cabin With
Stainless Steel
Hair Line Finish Car

Application :

Cab Exterior

Full glazing	Laminated safety glass
Cab exterior panelling	Stainless steel, satin finish, concealed fixing
Ceiling rails	Stainless steel, satin finish
Platform	Aluminum bulb plate all-over
Crossarms and traction angles	lacquered
Door drive	lacquered

KRUPA
ELEVATORS

Krupa Hospital Elevator

Available Rated Speed :	0.63 / 1 MPS
Max Travel Height :	66 M
Available Rated Capacity :	1020 to 1768 Kgs
Max Passengers :	15 to 26 Passengers

KRUPA Hospital Bed Elevators, a right choice for your hospital needs are designed to greatly contribute to provide the most secure and reliable ambience that your hospital requires.

Intellectual
Control

Noise
Reducing

Smooth and
Comfortable

- Smooth and secure
- Electromagnetic compability
- Emergency landing device

Features :

- Speed options from 0.35 m / sec to 1.5 m / sec.
- Capacity options from 15 to 26 passengers.
- Car and door finish options - powder coated / stainless steel.
- PVC / Chequered flooring.
- Various types of door options such as collapsible / imperforated / Telescopic / automatic centre opening doors.

Stainless Steel Cabin

Goods Elevator

Available Rated Speed : 0.50 / 0.70MPS
 Max Travel Height : 66 M
 Available Rated Capacity : 500 to 4000 Kgs

Car Elevator

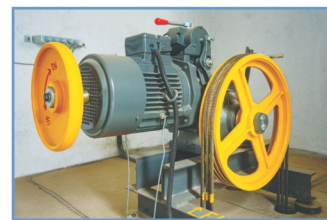

Available Rated Speed : 0.30 / 0.50 MPS
 Max Travel Height : 30 M
 Available Rated Capacity : 2500 to 4000 Kgs
 Segment : Industrial applications & Car Parks

The Most Reliable Parking Assistants

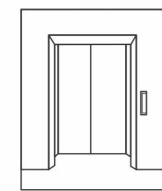

Bear any heavy load at ease.
 easy transport

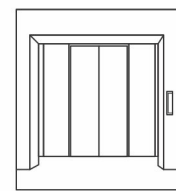

Heavy Duty Powder Coated Cabin

Heavy Duty Traction Machine

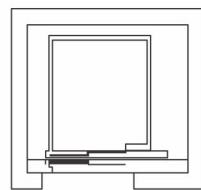

Two Panel Sliding Panel

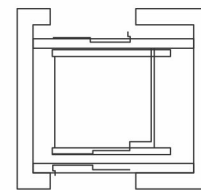

Center Opening & Double Folded

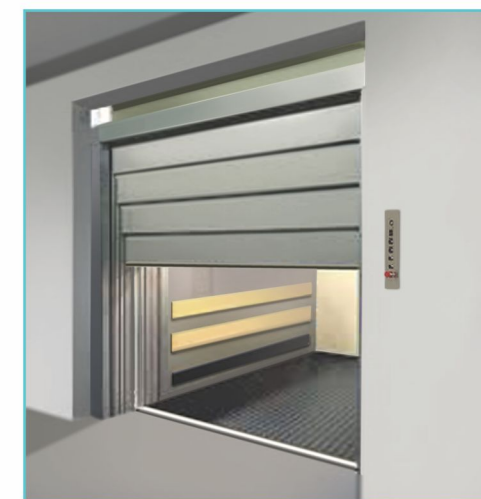

Accurate Leveling

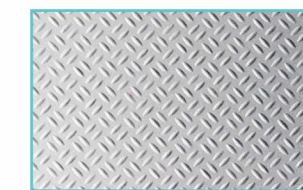

Single Way Door

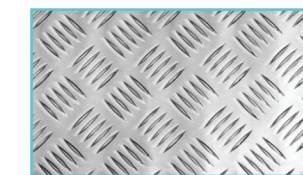

Double Way Door

Vertical Bi-Partial Door

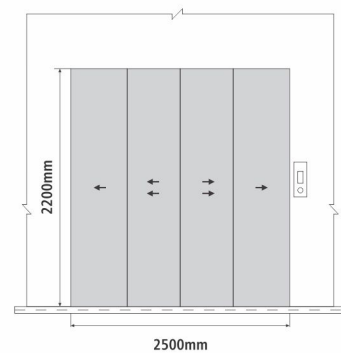

S.S. Checkered Plate

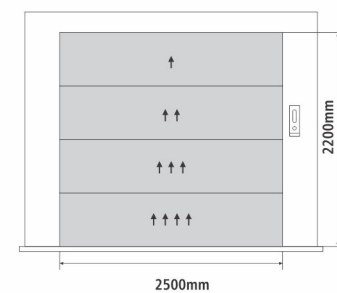

Aluminum Checkered Plate

Features :

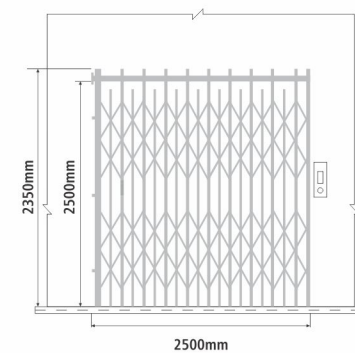

- Auto / Manual door opening Option.
- Two side opening option.
- These are safe and reliable.
- Heavy duty traction machine.

Centre Opening Automatic Landing Door

Vertical Opening Automatic Landing Door

Collapsible Landing Door

Car Puzzle Parking

Car Scissor Lift

Car Stacker Parking

MRL Elevator Machine Roomless Elevator

Available Rated Speed : 1.00 / 1.50 / 2 MPS
Max Travel Height : 66 M
Available Rated Capacity : 408 to 884 Kgs
Max Passengers : 06 to 13 Person

New generation permanent magnet synchronous gearless traction machine

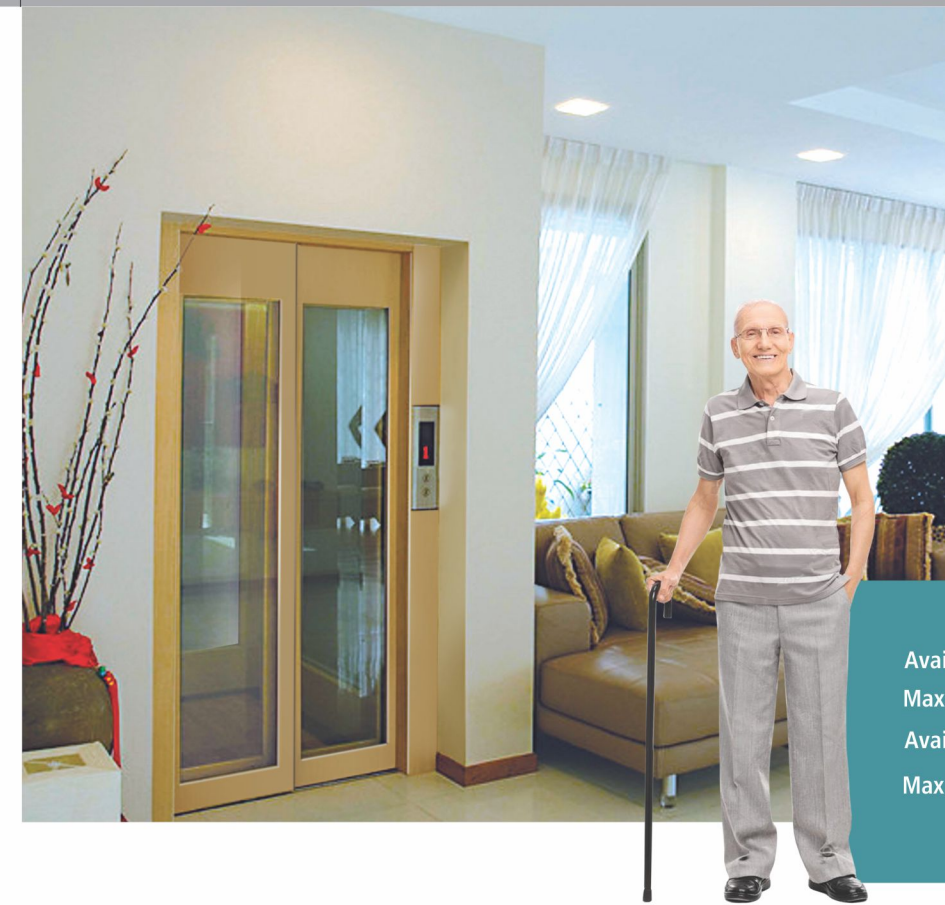

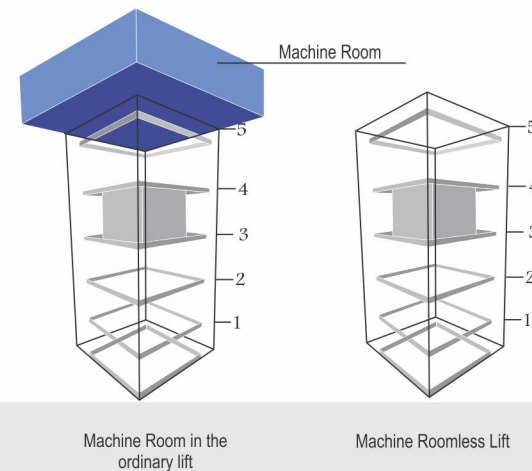

Minimal space. maximum value !

In order to know the concept of environmental protection, energy saving, saving building area, improve the degree of freedom in design is the responsibility of the KRUPA ELEVATORS without machine room, fully reflects the green spirit of humanity, the elevator needs only one independent well space, without room, with the same load weight level than conventional elevators, saving energy by 40%, save construction area of 10%.

It saves 25% of total elevator equipment area.

It reduces 40% of space occupation

KRUPA
ELEVATORS

Home Elevator

Available Rated Speed : 0.30 / 0.63 MPS
Max Travel Height : 12 M
Available Rated Capacity : 204 to 272 Kgs
Max Passengers : 3 to 4 Passengers

Change Your Lifestyle with Best Home Lift

Our Company is enlisted as the reputed manufacture, service provider and supplier of Home Elevators.

Quality stands on paramount importance to us and we make no compromises in the same. Our ultra-modern home elevators compliment your home architecture. We customize our design to suit the interiors and the tested of our clients. The range is installed in multi storey houses, pent houses, bungalow and villas.

High Car Ceiling Height : 2100mm
Electric Fan (Option)

LED Down Light Type
(CE-EDB-C30)

High Entrance Height 2000mm

Landing Operating Panel

Car Operating Panel

40% Energy Saving

Main feature and benefits :

- Runs with single phase power supply.
- Required very compact overhead space and pit area.
- Saves up 40% energy compared to hydraulic elevator.
- Noiseless and vibration free.
- Easy to install and maintain.

40%
ENERGY SAVING

Hydraulic Elevator For Low Rise

The products are of the compact structure, low fault rate, easy for the Daily maintenance.

Available Rated Speed : 0.30 MPS
Max Travel Height : 15 M
Available Rated Capacity : 225 / 1800 Kgs
Max Passengers : 03 / 24 Passengers

Green Solutions For Better Tomorrow

Compared with traction lift, hydraulic has the following obvious advantages :

Flexible setting of the machine room position top machine room is not needed.

A machine room can be flexibly set within 0.5 meters rangers near the shaft which more comply with the individual design requirements of the constructions.

Wide loading range, strong adaptability, large car and tonnage design, maximum carrying ability reaches to 3 tons.

Saving space and energy consumption, reducing the cost counterweight device is not needed, which increases the utilization rate of the hoist way and greatly saves the construction space and cost.

Advantages & Benefits

Machine Room
Not Required.

No
Maintenance.

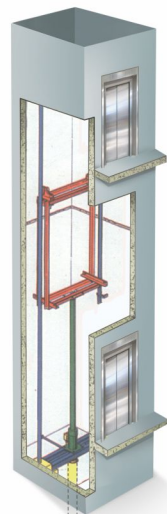

Electric Power
Not Required in
Down Direction.

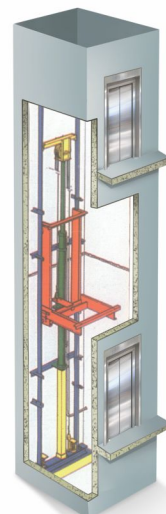

Easy &
Fast Installation.

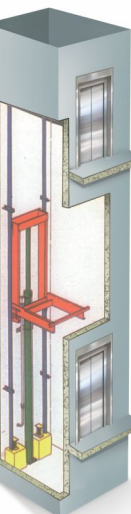

Direct Central Acting

Indirect Side Acting 2:1

Direct Side Acting

Specifications Hydraulics

Minimum shaft depth	1500mm (constructionally)
Minimum last floor height	3100mm (constructionally)
Minimum DBG	500mm
Speed	Up to 0.5m/s
Maximum travel	12m c

COP & LOP

SHARING Wonder together

► Specialized, Service Team

All maintenance service personnel are received strict on the job training to execute standard maintenance procedures and provide perfect service experience for customers by depending on strong technical supporting network as well as management system.

► Superior, Spare Parts

All supplied spare part are received strict test before delivery, which includes escalator's components of various models distribution network has covered lots of cities all or north India for rapid supply and timely replacement.

► Secure, Elevator Monitoring System

Achieve information management of operations such as 24-hour elevator monitoring, timely alarm along with rescue and maintenance, inspection etc so as to guarantee elevator's safe operation and carry out more convenient and efficient elevator management.
